

MARWAN TAMER SAYED

Cairo, Egypt | marwantamer004@gmail.com | 01553278930 | [LinkedIn](#) | [GitHub](#)

Summary

Aspiring Data Scientist and final-year Computer Science student at Cairo University with experience in Python, machine learning, and statistical analysis. Skilled in data preprocessing, feature engineering, and model development using pandas and scikit-learn. Experienced in building RAG systems and exploring Agentic AI workflows with LLMs. Proficient in data visualization and deploying solutions using FastAPI and Docker.

EDUCATION

Faculty of Computers and Artificial Intelligence, Cairo University

Sep 2023 - Jun 2027

BS in Information Systems

- GPA: 3.15 / 4.00

EXPERIENCE

Machine Learning Trainee

Nov 2025 – Present

Digital Egypt Pioneers Initiative

Cairo, Egypt

- Trained in data science, machine learning, and AI through hands-on projects
- Developed ML solutions using Python, including data preprocessing, feature engineering, and model evaluation
- Explored LLM applications, including basic RAG pipelines and AI-driven workflows

Advanced Data Analytics Trainee

Jun 2025 – Jul 2025

NTI/ITIDA

Cairo, Egypt

- Contribute to AI workshops and technical initiatives.
- Collaborate on projects to enhance ML and problem-solving skills.

SKILLS

Technical Skills:

Programming Languages: Python, C++, C, Java, HTML, CSS, JavaScript

Data Science & Machine Learning: Machine learning, feature engineering, model evaluation, statistical analysis, data wrangling, exploratory data analysis (EDA), data visualization, pandas, NumPy, scikit-learn, matplotlib, seaborn

AI & LLM Technologies: LangChain, LangGraph, Retrieval-Augmented Generation (RAG) systems, LLM applications, Agentic AI workflows

Databases & Backend Technologies: Microsoft SQL Server, FastAPI

Tools & Platforms: Git, GitHub, Docker, Microsoft SQL Server

Soft skills:

Professional Skills: Analytical and problem-solving mindset, team collaboration, time management, task prioritization, technical communication, reporting, ability to work independently

PROJECTS

AI Support Ticket Assistant

- Built an AI-powered customer support system to assist agents in analyzing and resolving support tickets, improving workflow efficiency by ~40% and reducing manual handling time.
- Developed a DistilBERT-based text classification model achieving ~90%+ accuracy for automatic issue categorization across multiple support categories.
- Designed an Agentic RAG pipeline using LangGraph and LLMs to generate contextaware solutions, improving response relevance and quality by ~30–35%.
- Implemented a hybrid search retriever combining semantic (vector-based) and keyword search, increasing retrieval precision and reducing irrelevant results by ~30%.
 - Deployed the full application using Streamlit, enabling real-time predictions, confidence scores, and AI-assisted resolution support with an interactive user interface.

Obesity Levels Analysis & Prediction

- Developed an end-to-end ML system for predicting obesity categories using EDA, preprocessing, and an optimized SVM model.
- Built and deployed a FastAPI backend with a real-time prediction endpoint, containerized using Docker.

EXTRACURRICULAR ACTIVITIES

AI Committee Member | DSC, Cairo University

- Contribute to AI workshops and technical initiatives.
- Collaborate on projects to enhance ML and problem-solving skills.

COURSES

AI Data Science Diploma (160 Hours) Optical Soft Company

Jul 2024 – Mar 2025

- Completed an intensive, industry-oriented diploma covering data analysis, machine learning, and applied artificial intelligence
- Gained hands-on experience in data preprocessing, EDA, feature engineering, supervised learning, and model evaluation
- Applied Python, NumPy, pandas, scikit-learn, and visualization tools to solve real-world data science problems
- Achieved Excellent overall performance with a 92% final evaluation (Distinction) and 4.5/5 rating
